

## THE NEUTRALIZING ANTIBODY TEST

## UNDERSTANDING IMMUNITY IN A PANDEMIC

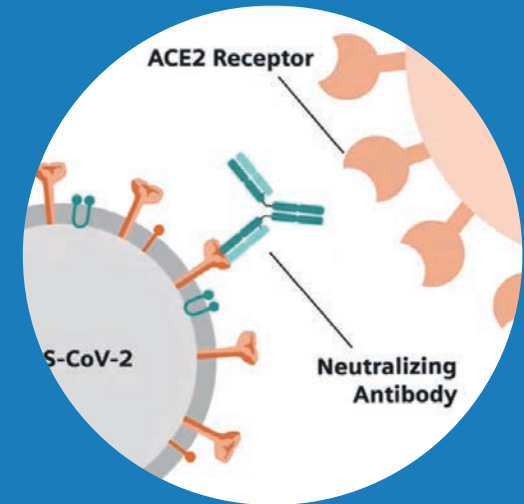

Neutralizing antibodies (NAb) are the **only** antibodies produced by your body's immune system that will prevent the SARS CoV-2 (COVID-19) virus from penetrating and infecting the cell.

The test you are getting is the only one in the market that identifies the presence and quantity of these protective antibodies. You will find out if you have an adequate percentage and amount of these antibodies (positive protection versus negative protection against SARS CoV-2)\*

Pairing with the EVE Patient App, will provide you all this information. The app will notify you when it is time to retest.

\*Decisions based on these test results should only be made after consultation with your physician.

## PROTECTION FROM SARS COV - 2 INFECTIONS

### THE IMPORTANCE OF NEUTRALIZING ANTIBODIES

The neutralizing antibody test is a simple blood draw or fingerstick that can be performed at a clinic or dedicated site. Before having the test you will:

- Download and register on the EVE Patient App (IOS and Android).
- At the site, you will use the app to scan a barcode label provided to you.
- You will need to answer a few survey questions and provide a signature on the app. Once this is completed your account is connected to the lab.
- You will receive alerts during the processing and the final result will be given to you via the app, a text message and an email.

## EVE PATIENT APP

### RESULTS IN REAL - TIME

A HIPAA compliant IOS and Android app that connects directly with the lab that is processing the lab test:

- Gives status updates during processing.
- Gives the lab result in real-time as a written report and an ImmunoCard
- Identifies if you have positive or negative neutralizing activity.
- Identifies the date when you should retest.
- Alerts you in advance when you should retest.

## PROVIDING THE BEST INFORMATION IN THIS TIME OF UNCERTAINTY

### The ImmunoCard: Instant and Secure Access to Your immunity Status

- Clear and concise description of the key information in the neutralizing antibody test\*
- Retesting date identified
- Instant access to the full lab report

\* Decisions based on this test result should be made in consultation with your physician

This test has been authorized only for detecting the presence of antibodies against SARS-CoV-2, not for any other viruses or pathogens. This test has been modified under CLIA to report total %, quantification in IU/ml, automation, and finger stick specimens

## ABOUT THE LABORATORY

Healix Pathology is a physician-owned and operated reference laboratory, serving pathology groups, independent and hospital-owned laboratories, health systems, integrated and accountable care networks, self-funded health plans, employers, and health-related entities making testing available directly to patients.

Our laboratory is a CLIA-Certified, high-throughput, fully-automated testing platform beginning at accessioning and ending at the result, eliminating inevitable human errors in handling, leading to incorrect results being reported.

## DOWNLOAD THE APP

The EVE Patient App is an IOS and Android App. It is available in the App Store and Google Play Store.

By scanning the QR codes below, the user will be able to download the app on your mobile phone.
